“We plant our own vegetables, produce our own food with no stress and we feed our bodies and soul.”

In the past three years, more than 200 families have participated in the Container Garden Program at Hoa'Āina O Mākaaha. Together, we have learned how to grow a variety of vegetables in containers, raised worms for compost and watched both fish and vegetables grow together in an aquaponic system.

At Our Annual Farm Open house our staff , students and other organizations from the community will launch a movement!

We will encourage **Everyone** to have a container garden at their homes to become healthier individuals and families. So, Let's Start Today!!
