

# Health

The idea of looking at health from the standpoint of oxidation and antioxidation is relatively new. Although divergent with conventional approaches, this idea provides a clearer concept of natural or alternative approaches to the maintenance of good health. Antioxidants are agents that inhibit oxidation. Antioxidants can neutralize the oxidant effect of free radicals and other substances.

These statements have not been evaluated by the Food and Drug Administration. These products are not intended to diagnose, treat, cure, or prevent any disease.

● **EM-X Rice Bran Liquid Dietary Supplement**

This gold colored liquid is made especially for human consumption using EM technology. It consists of the extracts of whole grain rice, rice bran, papaya, and kelp in water, processed naturally, the EM way.

● **EM Seasoning Salt**

EM Seasoning Salt is manufactured utilizing EM technology and is a wonderful alternative to regular table salt to enhance the flavor of foods.

# Environment

● **EM-X Ceramic Ringstone**

The EM-X Ceramic Ringstone can make water clusters smaller so water becomes milder. Easy to use: Just put one in your cup, glass, or pitcher of water. It's also useful to place one in the kettle when boiling water.

# EM

“EM” means “Effective Microorganisms.” EM technology, born in Okinawa, has been utilized in over 100 countries in various applications such as agriculture and the environment.

Now EM technology has been used to produce EM-X Rice Bran Liquid Dietary Supplement, EM Seasoning Salt, and EM-X Ceramics. The mission of EM Corporation is to provide the EM products to the world.
